CHAPTER 1

GENERAL

AIMS

1. The aim of the Cadet Program is to develop in youth the attributes of good citizenship and leadership, promote physical fitness and stimulate the interest of youth in the sea, land and air activities of the Canadian Forces (CF).
2. The aim of the Proficiency Level Two Program is to provide an air cadet with the basic theoretical knowledge and practical experience required to participate in cadet squadron activities as a flight member.

PROGRAM MISSION AND PARTICIPANT OUTCOMES

3. The mission of the Cadet Program is to contribute to the development and preparation of youth for the transition from adolescence to adulthood, enabling cadets to meet the challenges of modern society, through a dynamic, community-based program.
4. Cadet Program participant outcomes are the benefits for the cadet during and/or after their involvement with the program that relate to knowledge, skills, attitudes, values, behaviour, condition and status. The five outcomes of the Cadet Program are:
 - a. emotional and physical well-being;
 - b. social competence;
 - c. cognitive competence;
 - d. proactive citizenship; and
 - e. understanding the CF.
5. The program mission and participant outcomes are explained in greater detail in CATO 11-03, *Cadet Program Mandate*.

OUTLINE OF TRAINING

6. The Proficiency Level Program is a directed program carried out at the cadet squadron focused on giving all cadets instruction and opportunities to develop knowledge and skills in a variety of subject areas while introducing them to specialized activities. This program is divided into five levels of training. Normally a cadet will only attempt one level in a given training year.
7. Each proficiency level is composed of performance objectives (POs) subdivided into enabling objectives (EOs).

PROGRAM DESIGN

8. The Proficiency Level Two Program has been designed:
 - a. assuming that the majority of second year cadets are between 13 and 14 years of age;
 - b. assuming that the majority of cadets have successfully completed Proficiency Level One;
 - c. using age-appropriate learning strategies;
 - d. using 30 minutes as a standard period of instruction;

- e. by providing a programming mix consisting of fixed mandatory and flexible complementary training;
- f. to include training which is experiential and skill-based, with a lesser focus on theoretical knowledge; and
- g. assuming that learning will take place through a combination of programmed periods of instruction, unstructured discussions, teachable moments, and coaching/mentoring opportunities.

USE OF THE QSP

13. This QSP shall be used as the primary authority governing the development, implementation, conduct and evaluation of the training and standards to qualify a cadet as Proficiency Level Two. This QSP shall also be used by the Director Cadets and Junior Canadian Rangers as the primary reference for validation of Proficiency Level Two qualification training.

14. The Proficiency Level Two Program shall be conducted using this QSP as the training control document in conjunction with A-CR-CCP-802/PF-001, *Royal Canadian Air Cadets Proficiency Level Two – Instructional Guides*.

CHAPTER 2

TRAINING MANAGERMENTS DETAILS

RESPONSIBLE AGENCY AND TRAINING ESTABLISHMENTS

1. The Managing Authority for the Air Cadet Proficiency Level Program is the Director Cadets and Junior Canadian Rangers (D Cdts and JCR). The conduct of said program is the responsibility of the Regional Cadet Support Units (RCSUs) through authorized Training Establishments (TEs). These TEs include:

- a. Royal Canadian Air Cadet Squadrons (RCACS); and
- b. Technical TEs, such as:
 - (1) Regional Cadet Air Operations (RCAOPS); and
 - (2) other zone, detachment or regional TEs as authorized by the RCSU Commanding Officer (CO).

TRAINING DETAILS

2. In accordance with CATO 11-04, *Cadet Program Outline* and CATO 51-01, *Air Cadet Program Outline*, the Proficiency Level Program is conducted between 1 September and 30 June of each training year through a combination of training sessions and supported training days/weekends. The Proficiency Level Program is divided into two compulsory components that must be completed by all cadets. These components are:

- a. **Mandatory Training.** Mandatory training is a scheme of activities that is requisite for squadrons, and in some instances, specialized TEs to conduct and for cadets to accomplish in order to complete the Proficiency Level Program.
- b. **Complementary Training.** Complementary training is a scheme of activities that is requisite for squadrons, and in some instances specialized TEs to conduct and for cadets to accomplish in order to complete the Proficiency Level Program. These activities complement mandatory activities and form an integral part of the Proficiency Level Program. COs have the discretion to choose activities from a range of possibilities, thus allowing them flexibility to tailor the Proficiency Level Program to match the squadrons' interests and resources.

3. **Proficiency Level Two Program Outline.** The distribution of mandatory and complementary training in Proficiency Level Two is as follows:

- a. Mandatory Training:
 - (1) 60 periods of instruction to be conducted during training sessions (3 periods per session);
 - (2) 18 periods of instruction to be conducted during mandatory training days (9 periods per day) for a total of two days;
 - (3) one day for a familiarization flight and elemental training;
 - (4) one day for an inter-squadron "Cadet/Air Skills" competition; and
 - (5) one weekend (12 periods allocated training) for an aircrew survival (ACS) exercise.

b. Complementary Training:

- (1) 30 periods of instruction to be conducted during training sessions (3 periods per session);
- (2) 18 periods of instruction to be conducted during complementary training days (9 periods per day) for a total of two days; and
- (3) Choice of additional field training, day for inter-squadron “Cadet/Air Skills” competition and/or an elemental training day (total of two days).

4. **Period Allocation.** Periods are 30 minutes in duration. A detailed period allocation is located at [Annex A](#). Total period allocation by PO is as follows:

5. **Training Capacity.** The training capacity is limited to the capacity of the cadet squadrons to meet supervision requirements in accordance with CATO 13-12, *Supervision of Cadets*, and in some cases, to established quotas.

6. Training Staff Requirements

a. Squadron Training Officer (Trg O):

Rank	MOSID	Number	Qualification
Lt/Capt	00232-03	1	Minimum: Captain Qualification; or DP2 Junior Officer CIC Qualification Preferred: Senior Instructor Course; and CIC Training Officer Course

b. Proficiency Level Two Course Officer (Level Two Crse O):

Rank	MOSID	Number	Qualification
2Lt/Lt	00232-03	1	Minimum: Basic Officer Qualification; or Basic Military Officer Qualification (CIC Common) Preferred: Military Occupation Course (Air); or Basic Military Officer Qualification (CIC Air)

Note: This position may also be filled by an OCdt, should circumstances warrant.

c. Instructors:

Rank	MOSID	Number	Qualification
Cadet F/Sgt and Above	N/A	1 per 10 Cadets	Minimum: Completion of Proficiency Level Four Program Preferred: CSTC specialties appropriate for activity requirements (e.g. Air Rifle Marksmanship Instructor to instruct PO 206 Air Rifle Marksmanship)

7. **Technical Specialists.** Technical specialists possess specific specialty qualifications. The number of technical specialists required is influenced by policy documentation specific to the activity (e.g. CATOs, *Water Safety Orders*, etc.) and by local circumstances, which will also influence the structure for instructional or training support cadre(s). The technical specialists required in support of Proficiency Level Two are:

a. Fitness and Sports Instructor(s) in support of PO 204 and PO 205 as required;

- b. Range Safety Officer (RSO) (Air Rifle) in support of PO 206 and PO C211. as required;
- c. Air Rifle Marksmanship Instructor(s) in support of PO 206 as required;
- d. Drill and Ceremonial Instructor(s) in support of PO 208 as required;
- e. Aircrew Survival Instructor(s) in support of PO 290 as required; and
- f. Guest Speaker(s) as required.

8. **Resource Requirements.** RCSU COs are responsible for ensuring that required equipment and supplies are available. A detailed list of material, audiovisual equipment and training/learning aids required to conduct the training is located at [Annex C](#).

TRAINING ADMINISTRATION

9. **Cadet Evaluation.** Details on cadet evaluation are found in Chapter 3.

10. **Reports.** The Trg O should maintain a training file on each cadet to record their progress during the training year. The training file should consist of, as a minimum, a Proficiency Level Two Program Qualification Record (Chapter 3, [Annex B](#)). Training files are temporary documents which may be disposed of upon migration of Proficiency Level Two Program Qualification Record to the Cadet Personnel Record (DND 2399).

QUALIFICATION

11. Upon completion of the Proficiency Level Two Program, the cadet is qualified for promotion to the rank of Corporal (Cpl). However, completion of Proficiency Level Two training does not ensure promotion. Cadets must meet all other promotion criteria as stipulated in CATO 51-02, *Air Cadet Promotions*.

RELATED DOCUMENTS

12. This QSP is to be used in conjunction with:
- a. Cadet Administration and Training Orders (CATOs); and
 - b. A-CR-CCP-802/PF-001.

SPECIAL INSTRUCTIONS

13. **Scheduling.** When planning training, Trg Os are to be familiar with the lesson specifications found in Chapter 4. While a sample schedule is located at [Annex B](#), it does not account for the many variables squadrons face when developing annual training plans. Some things to consider when developing the annual training plan are:

- a. the training environment required for each activity:
 - (1) some activities will require an outdoor environment which requires consideration for seasonal climate; and
 - (2) some activities will require the use of a special facility, such as a gymnasium or sports field;
- b. the availability of a technical specialist to conduct the activity, if required to conduct the activity;
- c. the logical grouping and sequencing of EOs to take advantage of interrelationships that exist within the instructional material; and
- d. the scheduling of training during sessions relative to weekend training, e.g. identifying EOs that must be delivered just prior to a training day or weekend to prepare the cadets for the event.

14. Training Days/Weekends

- a. The planning and conduct of training days is the responsibility of the cadet squadron. Day training shall be conducted at the cadet squadron parade location or, where suitable facilities do not exist or are not available at the cadet squadron parade location, within the local community.
- b. The conduct of the familiarization flight and elemental day are normally the responsibility of Technical TEs. The planning of these activities is to be done in conjunction with the Area Cadet Detachment/RCSU and the applicable Technical TE.
- c. In accordance with CATO 11-04, *Cadet Program Outline*, weekend training shall normally be conducted within three hundred kilometres of the cadet squadron parade location.
- d. Where support of mandatory or complementary days/weekends is required, requests shall be forwarded to the appropriate RCSU. Refer to CATO 51-01, *Air Cadet Program Outline*, and regional orders for amplified information on support available from RCSUs.
- e. Training days and weekends shall be structured, unless otherwise specified in the individual proficiency level QSP, to include cadets from all levels of the Proficiency Level Program.

TRAINING DAY/WEEKEND ALLOCATION

MANDATORY

Activity	Description	Time
Mandatory Training Periods	18 periods of instruction (9 per day) chosen from the mandatory EOs to be delivered during a full day of training. POs 202, 205 and/or 206 are best suited for delivery during training days; however, the flexibility does exist for squadrons to deliver the POs that best suit their circumstances (i.e. infrastructure, resource availability, etc.).	2 Days
Familiarization Flight/ Elemental Day	Every Proficiency Level Two cadet will be given an opportunity to experience a familiarization flight in an aircraft determined by RC Air Ops O. In addition to each familiarization flight, squadrons should maximize the training value of this allocated day by providing additional “air” experiences which could include participating in a number of complementary training activities.	1 Day
Inter-squadron “Cadet/ Air Skills” Competition Day	A one-day competition, or two-day if combined with a complementary day, in support of common POs 203, 206, 208 and elemental POs 240, 260, 270 and 290.	1 Day
Field Exercise	One weekend of mandatory support will be provided for cadet squadrons to participate in an overnight exercise to include delivery of PO 290.	1 Weekend
Total Mandatory		6 Days

COMPLEMENTARY

Activity	Description	Time
Complementary Training Periods	18 periods of instruction (9 per day) chosen from the complementary EOs to be delivered during a full day of training. POs 202, 205 and/or 206 are best suited for delivery during training days; however, the flexibility does exist for squadrons to deliver the POs that best suit their circumstances (i.e. infrastructure, resource availability, etc.).	2 Days
Plus Combination of Two Days From the Following		
Field Exercise	One or two days, conducted either in conjunction with the mandatory weekend or separately, can be provided for cadet squadrons to participate in additional field training that can include delivery of PO/EOs C290.01 to C290.05 and practical experience in support of PO 290.	1 or 2 Days or 1 Weekend
Inter-squadron “Cadet/ Air Skills” Competition Day	An additional day of competition added to the mandatory one-day competition in support of common POs 203, 206, 208 and elemental POs 240, 260, 270 and 290.	1 Day

Activity	Description	Time
Elemental Day	One day to provide additional complementary elemental training not previously conducted.	1 Day
Total Complementary		4 Days

CHAPTER 3

CADET EVALUATION

PURPOSE

1. The purpose of this chapter is to outline the specific evaluation requirements for the Proficiency Level Two Program of the Royal Canadian Air Cadets.

LEARNER EVALUATION

2. “Learner evaluation is the assessment of progress made by participants during an instructional program (formative evaluation) and of their achievement at the end of the program (summative evaluation).” (A-P9-050-000/PT-Z01, *Manual of Individual Training and Education, Volume 1 (1), Glossary*)

DEVELOPMENTAL PERIODS

3. A developmental period (DP) is a time frame, during a cadet’s progression through the CP, in which the cadet participates in training and is provided opportunities to develop desired knowledge, skills and attitudes that support the aims of the CP and contribute to the achievement of the CP outcomes. DPs are distinguished by progressive training levels and associated learning objectives ensuring each level of training will be relevant, achievable and age-appropriate for the target audience.

4. The CP is conducted across the three adolescent DPs applicable to the CP population. Outlined in each DP are specific philosophies and approaches to learning which impact training and evaluation. Proficiency Level Two training and evaluation are participatory in nature. A basic overview of the DP characteristics is located at [Annex A](#).

PROFICIENCY LEVEL TWO CADET EVALUATION

5. The intent of Proficiency Level Two cadet evaluation is to measure the extent of cadet participation in the scheduled mandatory and complementary training and make an assessment by comparing the level of participation to the minimum standard required for qualification.

PROFICIENCY LEVEL TWO QUALIFICATION STANDARD

6. The minimum standard for Proficiency Level Two Program qualification is:
- a. sixty percent overall attendance in all scheduled mandatory and complementary training as calculated by the squadron; and
 - b. successful completion of each PO as outlined in the Proficiency Level Two Program Qualification Record located at [Annex B](#).

ADDITIONAL CADET EVALUATIONS

7. All cadets must successfully complete the Cadet Air Rifle Handling Test, located at A-CR-CCP-801/PG-001, *Royal Canadian Air Cadets, Proficiency Level One Qualification Standard and Plan*, Chapter 3, Annex C, prior to participating in familiarization and recreational marksmanship activities.

8. No additional cadet evaluations (i.e. theory tests, performance checks, etc.) are to be used to determine Proficiency Level Two qualification eligibility. Therefore, these national standards are not to be supplemented with regional and/or local standards.

MONITORING CADET PROGRESS

9. Cadets must meet the standard of behaviour and conduct expected from all cadets. The course officer during cadet interviews and personal counselling should adopt a proactive approach towards difficulties.

10. Frequent absences from mandatory and complementary training that could result in the cadet not meeting the minimum standard for Proficiency Level Two qualification must be addressed in accordance with CATO 15-22, *Conduct and Discipline – Cadets*.

REPORTING CADET PROGRESS

11. The progress of each cadet shall be reported using the Proficiency Level Two Program Qualification Record, located at [Annex B](#), which is also used to determine successful completion of the Proficiency Level Two Program. The results shall be recorded on DND 2399, Cadet Personnel Record.

CADETS NOT MEETING THE MINIMUM QUALIFICATION STANDARD

12. Cadets who do not meet the minimum qualification standard shall be given a reasonable opportunity to complete the training missed. If, by the end of the training year, the cadet still has not successfully attained any PO, the squadron CO may waive the minimum qualification standard. When waiving any PO requirement, the squadron CO should consider the overall performance of the cadet and the legitimacy of their reason for failing to attain the PO. In granting a waiver, the CO must also consider the cadet's attendance and behaviour.

13. Any cadet for whom a waiver has been issued will not be granted the Proficiency Level Two Qualification, however, they will progress to Proficiency Level Three in the third year of their squadron membership. If a CO has decided to not grant a waiver based on attendance and/or behaviour, a cadet may be held back to repeat Proficiency Level Two.

14. Cadets who have been granted a waiver of the minimum qualification standard of Proficiency Level Two and have progressed to Proficiency Level Three in the third year of their squadron membership are expected to achieve the missing Proficiency Level Two Program PO requirements. To facilitate this, cadets can concurrently receive credit for activities completed in Proficiency Level Three as part of also achieving Proficiency Level Two.

PROFICIENCY LEVEL TWO CERTIFICATE OF QUALIFICATION

15. The Cadet Certificate of Qualification, CF 558 (NSN 7530-21-870-7685), shall be awarded to each cadet upon successful completion of the Proficiency Level Two Program. Until cadets who have been waived from the minimum qualification standard have attained said standard, they shall not be granted the Cadet Certificate of Qualification.

CHARACTERISTICS OF CP DPs

DEVELOPMENTAL PERIOD (DP)	DEVELOPMENTAL PERIOD 1 (DP1)	DEVELOPMENTAL PERIOD 2 (DP2)	DEVELOPMENTAL PERIOD 3 (DP3)
AGES	12 to 14	15 to 16	17 to 18
YEARS	Y1 Y2	Y3 Y4	Y5+
DP OVERVIEW	Learning in the CP is designed around three progressive, DPs. The mental, physical, emotional, and social development of a cadet are considered in these age-appropriate DPs. The cadet develops and ultimately refines higher-level thinking skills (reasoning, reflective thinking, problem solving) as they progress through each DP.		
AGE-APPROPRIATE LEARNING	EXPERIENCE-BASED	DEVELOPMENTAL	COMPETENCY
DP DESCRIPTION	The cadet has well-developed automatic responses; however, the area of the brain that processes higher-level thinking is not yet mature. Effective learning is active and interactive with lots of practical experiences.	The cadet starts developing higher-level thinking skills such as problem-solving skills. Effective learning is interactive and practical, allowing cadets to start making decisions within their learning process.	The cadet is refining higher-level thinking skills. Effective learning is interactive and allows for increased individual responsibility and independent learning.
ASSESSMENT EXPECTATION	PARTICIPATORY	BASELINE PROFICIENCY	ENHANCED PROFICIENCY
ASSESSMENT PURPOSE	<ul style="list-style-type: none"> Stimulation and maintenance of an enhanced interest in the CP. <p>Note: Exposing the cadet to a variety of training activities and learning opportunities with the assessment expectation focused on participation will help accomplish this.</p> <ul style="list-style-type: none"> Exposure to a broad knowledge base and skill set. <p>Note: CSTC Summer 2 courses will begin to expose the cadet to some specific specialty areas, which will allow the cadet to discover possible areas of particular interest.</p>	<ul style="list-style-type: none"> Development of a broad knowledge base and skill set as well as introducing reasoning proficiency. Ongoing determination and development of specific specialty areas of interest and capability. Recognition of enhanced proficiency achievement. Ongoing stimulation and maintenance of an enhanced interest in the CP. 	<ul style="list-style-type: none"> Development of an enhanced knowledge, reasoning or skill proficiency in a targeted specialty area – related to interest, capability and cadet program requirements. Ongoing development of the broad knowledge base and skill set as well as reasoning proficiency. Ongoing recognition of enhanced proficiency achievement. Ongoing stimulation and maintenance of an enhanced interest in the CP.

<p>DEMONSTRATION AND PERFORMANCE</p> <p>Cadets observe the instructor performing the task in a demonstration, and rehearse it under the supervision of the instructor.</p> <p>Demonstration Method</p> <p>A method of instruction where the instructor, by actually performing an operation or doing a job, shows the cadet what to do, how to do it and through explanations brings out why, where and when it is done.</p>	<p>Demonstration Method</p> <ol style="list-style-type: none"> To teach hands-on operations or procedures. <p>EXPERIENTIAL LEARNING</p> <p>Learning in the Cadet Program is centred on experiential learning. This involves learning knowledge and skills from direct experience. People learn best from their own experiences and can then apply the knowledge and skills in new situations. The four stages of the cycle may be considered and applied to all activities within the Cadet Program, regardless of methodology chosen.</p> <p>Stage 1: Concrete Experience: Cadets have an experience and take time to identify and define what the experience is. Sample activities: direct observations, simulations, field trips, and reading.</p> <p>Stage 2: Reflective Observation: Cadets need to reflect on and examine what they saw, felt and thought while they were having the experience. Sample activities: discussion, journals/logs, and graphs.</p> <p>Stage 3: Abstract Conceptualization: Cadets work to understand and make connections from the experience to new or different situations. Sample activities: interview, discussion, model building, analogies and planning.</p> <p>Stage 4: Active Experimentation: Cadets look ahead to and plan the application of skills and knowledge acquired to future experience. Sample activities include: simulation, fieldwork.</p> <p>Note: The cycle is ongoing as each learning experience builds on another.</p>	<ol style="list-style-type: none"> 1. To teach practical skills. 2. To learn how to learn. 3. To teach transferable skills. 4. To teach a process or principle. 5. To teach problem solving. 	<ol style="list-style-type: none"> 1. Knowledge is shared and created by collectively by all participants. 2. Everyone is actively involved in the teaching – learning process. 3. Appeals to many learning styles. 4. Student centred. 	<ol style="list-style-type: none"> 1. Resource intensive. 2. Requires significant planning, preparation and organization prior to activity. 3. The instructor must master the subject developed. 4. Instructor needs very good pedagogical skills. 5. May not be a good process for learning details. 6. The instructor must be a good facilitator to carry out an effective reflective session in stage 2 and 3 of this method.
<p>FIELD TRIP</p> <p>Theoretical knowledge is reinforced through participation in an activity in a real-life setting. Prior planning helps to ensure all pre-training and safety standards are met. Field trip activities are planned and carried out to achieve clear instructional objectives that are understood by the cadets. Examples can include trips to areas of local interest, flying/gliding, hiking or sailing.</p>	<ol style="list-style-type: none"> 1. To introduce/illustrate and confirm topics. 2. To allow for familiarization activities. 	<ol style="list-style-type: none"> 1. Immerses cadets in a specific environment. 	<ol style="list-style-type: none"> 1. May require additional staff to ensure adequate supervision. 2. Requires significant planning, preparation and organization prior to activity. 3. May have cost implications.

Method(s)	Applications	Advantages	Disadvantages
<p>GAME-PLAYING Games are used with one or more participants to practice skills, apply strategies and enhance teams. It is critical that the game supports learning through the provision of a challenging activity that allows for the skill practice or knowledge confirmation.</p>	<ol style="list-style-type: none"> 1. To introduce a topic. 2. To discover concepts and principles. 3. To review and confirm. 	<ol style="list-style-type: none"> 1. Fun and interesting. 2. Creates ownership. 3. Highly participative. 	<ol style="list-style-type: none"> 1. May stratify the group by creating a winner and a loser. 2. May be difficult in providing instructor feedback.
<p>GROUP DISCUSSION Cadets discuss issues, share knowledge, opinions and feelings about a topic in small groups to meet a specified goal. The instructor's questioning is flexible and minimal, and aims at encouraging cadets to explore their own experiences and opinions through peer interaction.</p>	<ol style="list-style-type: none"> 1. To develop imaginative solutions to problems. 2. To stimulate thinking and interest and to secure cadet participation. 3. To emphasize main teaching points. 4. To supplement lectures and seminars. 5. To determine how well cadets understand the concepts and principles. 6. To prepare cadets for application of theory or procedure. 7. To summarize, clarify points or review. 8. To prepare cadets for instruction that will follow. 9. To determine cadet progress and effectiveness of prior instruction. 	<ol style="list-style-type: none"> 1. Increases cadet interest. 2. Increases cadet acceptance and commitment. 3. Utilizes cadet knowledge and experience. 4. Results in more permanent learning because of the high degree of cadet participation/cognitive involvement. 	<ol style="list-style-type: none"> 1. Requires highly skilled instructors. 2. <p>INTERACTIVE LECTURE The instructor-driven methodology combines both lecture and interaction to meet lesson objectives. Lecture portions of the lesson are offset with relevant activities such as videos with discussion, games to confirm and completion of handouts.</p>	<ol style="list-style-type: none"> 1. To orient cadets to the subject. 2. To give instruction on procedures. 3. To illustrate the application of rules, principles or concepts. 4.
